### **Connecting SightLogix Devices to the Chekt Bridge**

Last Modified on 12/23/2019 4:59 pm EST

Requirements: CHeKT Bridge running firwmware 2.5 and later

Once your SightSensor has been configured, use the instructions below to connect to the CHeKT Bridge.

• Log in to your Dealer Portal, as shown.

	Sight Logix Demonstrations	Dashboard			DD
•	DEVICES		STATUS	RECENTLY ADDED SITES	
*	Device Status		OFFLINE UNREGISTERED	Update	
۵	Online Offline Not Registered	Bridges Cameras 1 4 0 0 0 -		APPOINTMENTS This Week O Appointments TODAY W	EEKLY
	Events Statistics	2days ago 2days ago		NO SCHEDULE	

Note: You need a previously created CHeKT Customer Account Site before you add SightSensors. Follow the CHeKT instructions if needed: (https://support.chekt.com/portal/kb/articles/creating-a-new-customer-account)

• Once Customer Account has been created, select the Customers icon from the left-side navigation, as shown.

• You will see the list of Customers that have been created. Click the Customer Account to add SightLogix Devices. The details will display under Information, as shown.

<b>A</b>	All Dealers • 1 - 1 of 1 < >	General Devices Appointments Members Site Settings	Copy URL Monitoring Portal
*	Search +  SightSensor HD 324 Central Station: Sight Logix Demostrations	Information Save Contacts	Add

A live snapshot opens showing the most recent image from the camera.

• Click Next to mount each stream to the Bridge.

The Mount dialog opens, with entries for users that are connecting to an alarm panel. Since this is not part of the SightLogix setup, click Finish.

#### < Mount

Description

oomoro	Tunically this name is the	

Enter a name here that most accurately describes the zone sensor and camera. Typically this name is the same as the alarm panel description for the zone. Example: "Entry Motion Detector"

#### Alarm Panel Zone

Bridge Alarm Input #1 Information

If the sensor on this input is also connected to an alarm panel, then the zone number here must match the alarm panel zone number for this sensor. If no sensor is connected to this Bridge Input then the default zone number can remain or you can define a unique zone number for this site.

#### Select Zone Type

Select the appropriate zone type for the behavior of this zone. The Entry\Exit time settings are set on the setting for this Bridge unit.

Entry/Exit Zone

Follower Zone

Finally, the Mounting Status will verify the connections. When each step is verified the row will highlight in green with 'Success,' as shown.

neck the camera mounting status in real time	
Mounting Step Mour	nting Info
1. Connection Information	Success 00:00 👻
2. Auto Discovery	Success 00:08 👻
3. API Connection	Success 00:00 👻
4. Setting Stream Configuration	Success 00:00 👻
5 Checking Stream Configuration	Success 00:10 V

×

Finish

• Click Close to complete.

Optionally, you can add a second channel (CH2, typically the thermal stream). Click Authentication to add the second channel and follow the steps above.

You will now see the devices and their status in the Device List, as shown.

# Adding Remote Access to your SightLogix Device for Future Configuration

Now that you have added your SightLogix devices, you can remotely access your SightLogix device directly form the CHeKT portal. This offers an easy way to make changes to your SightLogix camera whenever needed.

Note that you must have Remote Access functionality enabled on your CHeKT account.

• To access your device remotely, select your SightSensor from the device list and click the Setting button.

• Select Remote Access from the Setting window.

HD324_HD#oe ♥ Online	GENERAL ALARM PR	VACY AUTHENTICATION REMOTE ACCESS	. Monitoring Portal
	Device Information Name Model Video Device Channel MAC Address Serial Number	HD324_HD#oe > SightSensor HD324-220 Network C 1 001808003B77 001808003b77	Upload Delete
	IP Address Connection	192.168.1.199 Online Since 12/23/19 10:45:00 am	

If you do not have the Remote Access option enabled on your account, a pop-up will open showing instructions for enabling this functionality.

• Use the slider to define the amount of time you want the link to stay active. Then click the Create Access URL

button.

HD324_HD#oe ♥ Online	GENERAL	ALARM	PRIVACY	AUTHENTICATION	× REMOTE ACCESS
	Remote Act How long wil	cess ↓ I you need a 10 min Cess URL	iccess to this	device?	2

• The URL will be created, as shown. Click the link (or copy and send ) to access your SightLogix device, which will open in a browser.

Remote Access						
URL for 10 minutes: Access URL: <u>http://34.232.51.81:10189</u>

### **Viewing Video and Alarms**

• To view live video and alarm clips, click the Monitoring Portal link at the upper right.

	Sight Logix Demonstrations	Customers / Devices		Search	
A	All Dealers v 1-1 of 1 < >	General Devices	Appointments Members Site Settings	Copy URL	Monitoring Portal
••	Q Search +				6
\$	SightSensor HD 324 Central Station: Sight Logix Demonstrations	O Device List	Add Site Map		Upload

The Monitoring Portal opens, showing live video on the left and a looping clip of the current alarm at right. The column at right shows the alarm queue.

• Select an alarm for details.

### **Connecting to an Alarm Automation System**

Visit the CHeKT portal to connect to third-party Alarm Automation systems, including Stages, Mastermind, Bold, and others: https://support.chekt.com/portal/kb/chekt/integrations
